

Jimmy Alejandro Plazas López

Software Engineer | Android Developer

Website: jimmyplazas.dev | Email: hi@jimmyplazas.dev

Summary

Passionate Android Developer with 4 years of experience designing and developing user-centric mobile applications using Kotlin, Jetpack Compose, and MVVM architecture. Adept at collaborating with cross-functional teams, mentoring peers, and solving complex problems. Skilled in delivering high-quality, scalable solutions aligned with business goals. Enthusiastic about learning new technologies to stay at the forefront of industry advancements.

Skills

Soft: Teamwork, Problem solving, Communication, Self-learning, Critical and Logical thinking, Creativity, Perseverance, Mentoring.

Hard: Kotlin, Jetpack Compose, Android SDK, SOLID, OOP, Clean Architecture, Firebase, Flow, Coroutines, LiveData, Material Design, Java, Retrofit, MVVM architecture, DataBinding, Git, GitHub, Jira, GitLab, Google Play Console, JavaScript, ReactJs, HTML, CSS, Postman, ClickUp, Slack.

Experience

Globant, Tibasosa, Colombia

May. 2022 - Mar. 2023

Android Mobile Developer Jr Adv

Responsibilities:

- Developed a high-performance Android application using Kotlin, Jetpack Compose, and clean architecture, enhancing app stability.
- Collaborated with a cross-functional team to debug issues and implement new features, improving overall app functionality and user satisfaction.
- Mentored junior developers, fostering a knowledge-sharing culture and increasing team productivity.

FletX, Tibasosa, Colombia

Nov. 2021 - May. 2022

Android Developer

Responsibilities:

- Built and maintained Android applications using Kotlin and Java, integrating RESTful APIs to improve data accessibility and performance.
- Implemented MVVM architecture, reducing codebase complexity and ensuring maintainability.
- Enhanced app usability by designing features with Material Design guidelines and integrating Google Maps functionality.

BPSmart, Tibasosa, Colombia

Mar. 2020 - Nov. 2021

Android Mobile Developer

Responsibilities:

- Developed Android applications in Kotlin integrated with Firebase for real-time data synchronization, improving app efficiency.
- Designed and implemented key features such as payment gateways, device services (location, camera, internet), and Intent calls for enhanced user interaction.
- Ensured smooth version control and team collaboration by managing repositories with Git and GitHub.
- Utilized Material Design principles to deliver visually appealing and user-friendly app interfaces.

Education

Pedagogical and Technological University of Colombia, Sogamoso, Colombia BS, Systems Engineering	<i>Aug 2015 ~ Jun 2022</i>
Kent Institute, Melbourne, Australia Certificate IV in Information Technology	<i>Jan 2024 ~ Dec 2024</i>
